- U.S. Government – 1,000+

An economic driver in Detroit and throughout Michigan, with a **\$2.75 billion annual impact** in the state.

Home to **six federally funded research centers**, including the Karmanos Cancer Institute, one of 57 National Cancer Institute-designated comprehensive care centers.

We hold **Carnegie R1 and Community Engagement** classifications. Only two Michigan institutions have both distinctive classifications.

WSU's Prosperity Agenda

Building on Wayne State's long-standing commitment to Detroit, WSU's Prosperity Agenda guides us as we support our students, strengthen our institution, and contribute to the flourishing of our city and state.

Accelerate Mobility for Our Students

A Wayne State education transforms students' lives for the better, leading to societal advancement and creating generational change. Recognized as a minority-serving institution by the U.S. Department of Education, we provide access to an R1 university education for highly qualified individuals from traditionally underserved communities. Here, students receive:

Engaging classroom education from our top-tier Carnegie R1 faculty, who are on the cutting edge of scholarly discovery and use innovative methods in their teaching that connect to Detroit's rich resources.

Real-world development opportunities with our collaborators, including internships, education abroad, community service learning, student research, professional mentoring and other business development opportunities that cultivate the knowledge and competencies that equip our graduates for successful careers and a bold future.

Empower Health for Our Urban Neighborhoods

Wayne State plays a vital role in Detroit's health. By unleashing our faculty, students and university leaders to engage even further with our community, we expand cutting-edge care and address entrenched health disparities to build healthier, more resilient neighborhoods in Detroit and beyond.

Community-engaged research: Funded by NIH's National Institute of Environmental Health Sciences, the **Center for Urban Responses to Environmental Stressors** works to understand how exposure to stressors in the urban environment can influence the development of environmentally linked diseases.

Community-immersed care: Affiliated with Nursing Practice Corporation and the College of Nursing, **The Taylor Street Primary Care Clinic** is a full-service, community-focused primary care clinic that provides care for people of all ages, many of whom are uninsured.

School of public health initiative: In establishing Michigan's newest community-focused school of public health, Wayne State is addressing urgent workforce needs and reaffirming our commitment to advancing public health for the benefit of our local communities.

Fuel Innovation for Our Competitiveness

By fostering innovation and entrepreneurship, Wayne State is propelling Michigan's competitiveness in 21st century commerce and fostering an "open for business" campus that creates solutions to the challenges endemic to urban areas and ensures a robust economy that benefits us all.

As a top-tier research university, Wayne State supports the discovery of new knowledge and transformational advancements by our faculty and students in areas including neuroscience, maternal health, population health, cancer and health policy, and supports our innovators as they translate that learning into commercially viable medicines, technologies and other solutions.

Much of this is accomplished through **TechTown**, WSU's entrepreneurship and business support hub, which has supported more than **6,000** businesses, created more than **2,200** jobs and raised more than **\$400 million** in capital.

WSU is also **one of only 85 universities nationwide** to receive the Association of Public and Land-Grant Universities' prestigious **Innovation and Economic Prosperity designation**, which honors institutions that demonstrate "a substantive commitment to regional economic engagement, growth and economic opportunity."

College to CAREER

Through **innovative academic experiences** and **Detroit-powered career-preparation opportunities**, students plan for a world in need of their skills and expertise.

Only Michigan R1 university to be recognized as a **Tier 1 institution** in **economic mobility** by Third Way.

WAYNE MOBILE HEALTH UNIT

The **Wayne Mobile Health Unit** has conducted more than **90,000** visits to date and, with the help of "big data" clinical informatics, helped **reduce the average blood pressure of entire neighborhoods**.

From pioneering the world's **first successful open-heart surgery** to launching the nation's **first comprehensive electric-drive vehicle engineering program**, WSU is on the forefront of pushing boundaries that save lives and change our world.
